## Projects

|  |                |
|--|----------------|
| <b>Binspire</b>   TypeScript, Python, IoT, MCP, PostgreSQL, AWS, HiveMQ, Nginx, Hono – <a href="#">Live URL</a>  | October 2023   |
| - Engineered an <b>IoT-enabled waste management system</b> for Arcovia City that provides real-time trash bin monitoring, live tracking of collection activities, object detection, and QR-code based collection verification using Raspberry Pi, HC-SR04 sensors, MQTT, and WebSocket <b>optimizing collection routes, reducing operational costs, and improving environmental sustainability</b> . |                |
| - Integrated <b>Binspire AI</b> , an <b>MCP (Model Context Protocol)</b> -powered intelligent chatbot supporting <b>OpenAI, Grok, LLaMA, and DeepSeek</b> , enabling multi-LLM data analysis, automated insights, and smarter decision-making for waste management operations.   |                |
| - Achieved <b>1st Runner Up</b> in the <b>IT Olympics – IoT Category</b> , competing against teams from <b>17+ top participating universities</b> .  |                |
| <b>Hiraya</b>   TypeScript, Lexical Analysis, AST, Syntax Parsing, Compiler Design   | December 2024  |
| - Designed and implemented a <b>Filipino-inspired programming language</b> to explore language design, syntax parsing, and compiler construction, demonstrating solid expertise in compiler architecture, abstract machine design, and programming language theory.  |                |
| <b>Predicting Carbon Monoxide Levels</b>   Python, UCI, Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn   | July 2024      |
| - Developed a <b>machine learning-powered CO prediction system</b> that analyzes environmental sensor data to forecast carbon monoxide levels with high accuracy, enabling <b>improved real-time air quality monitoring</b> and supporting <b>data-driven public health decision-making</b> .  |                |
| <b>ART</b>   Java, DSA, Time Complexity Analysis, Benchmarking, CLI  | September 2023 |
| - Implemented <b>execution time measurement, profiling and efficiency analysis</b> to evaluate <b>algorithmic complexity</b> in practice.  |                |
| <b>Decimo AI</b>   JavaScript, React, Vite, Express, Node.js, OpenAI   | January 2023   |
| - Built an interactive conversational AI solution, integrating <b>OpenAI's LLM</b> with a React frontend and Node.js/Express.js backend to facilitate <b>dynamic and natural language user interactions</b> .  |                |

## Skills

**Languages:** C++, Java, Python, Go, JavaScript, TypeScript, PHP, SQL

**Libraries & Frameworks:** Express.js, Hono.js, Node.js, FastAPI, Flask, Drizzle ORM, Prisma, tRPC

**Data & Machine Learning:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, OpenAI

**Tools & Platforms:** AWS, Digital Ocean, Git, GitHub, Linux, Bun, Firebase, MySQL, PostgreSQL, HiveMQ, Docker, Neovim, Raspberry Pi 4, Nginx

## Experience

|  |                        |
|--|------------------------|
| <b>14<sup>th</sup> IT Skills Olympics</b>   Participant (Team Leader)  | November 2025          |
| - Led the Binspire project, an <b>IoT-enabled waste management system</b> , which won <b>1st Runner-Up</b> at the <b>14th IT Skills Olympics</b> , demonstrating real-time data monitoring, route optimization, and backend scalability. |                        |
| <b>Software Developer</b>   Freelance – Remote   | June 2024 – Present    |
| - Designed and implemented secure server-side RBAC middleware, enabling dynamic permission validation and <b>improving backend authorization reliability</b> across multiple services.   |                        |
| - Developed and deployed a <b>scalable e-commerce platform</b> with TypeScript, Next.js, and Supabase, <b>focusing on API design, database modeling, and performant server-side operations</b> .   |                        |
| - Built a <b>disaster management system</b> for a local Barangay using native PHP, optimizing backend data processing, incident logging, and emergency response workflows.   |                        |
| <b>CCS Academic Competition</b>   Participant  | February 2023          |
| - Solved <b>3 out of 4</b> problem sets in my university Java programming contest during the first year.   |                        |
| <b>Open-Source</b>   Developer & Contributor   | January 2023 – Present |
| - Contributed to multiple community-driven projects on GitHub, enhancing open-source software.   |                        |

## Education

|   |                         |
|---|-------------------------|
| <b>Pamantasan ng Lungsod ng Pasig</b>                         | June 2022 – Present     |
| <i>Bachelor of Science in Information Technology</i>          |                         |
| <b>Awards:</b>  |                         |
| - President's List Academic Achievement Awardee               |                         |
| - Dean's List Academic Achievement Awardee                    |                         |
| <b>Rizal High School</b>                                      | March 2020 – March 2022 |
| <i>Information Communication and Technology - Programming</i> |                         |
| <b>Awards (Case Study):</b>                                   |                         |
| - Overall – Best System Presenter                             |                         |
| - Overall – Best System Design                                |                         |
| - Overall – Best System Functionality                         |                         |
| - Overall – Best System                                       |                         |
